

# YMC Delivers Pure Predictability in Scale-Up

Because the last thing you want to see during scale-up is a surprise.

YMC Stationary Phases bring you consistent selectivity from the first stages of development through pilot and onto the production floor.

YMC Systems provide precision and productivity from lab to GMP production; from peptide to mAb.

Our Insight Lab Services Team helps you get the most out of both.

Call us – we'll be with you at every step.

Offices and Labs in:  
USA, Europe, South America, India, Korea, Japan, China, Singapore, Taiwan
