

YMC Delivers Pure Predictability in Scale-Up

Because the last thing you want to see during
scale-up is a surprise.

YMC Stationary Phases bring you consistent selectivity from the first stages of development through pilot and onto the production floor.

YMC Systems provide precision and productivity
from lab to GMP production; from peptide to mAb.

Our Insight Lab Services Team helps you
get the most out of both.

Offices and Labs in:
USA, Europe, South America, India, Korea, Japan, China, Singapore, Taiwan
