# For Laboratory Scale Applications

Biocompatible Self-packing Easy Handling

# **YMC Glass Columns**

**B**iochromatography is widely used for high-performance downstream processing techniques for a wide range of compounds, including proteins, peptides or nucleic acids. When using various chromatographic techniques such as ion exchange, affinity or gel permeation chromatography, high-performance separation media are increasingly used and, as a result, higher demands are made on the quality of the column hardware.

# Laboratory Scale: ECO and ECO<sup>PLUS</sup> Glass Columns

ECO columns are glass columns for use with almost all types of soft gels and medium pressure liquid chromatography applications. ECO<sup>PLUS</sup> columns meet the highest criteria for professional laboratory use. Particular attention has been paid to the column volume ranges and the pressure resistance, so that high flow rates, performance and efficiency can be achieved.

# ECO Glass Columns

### **ECO Glass Columns**

- First choice for medium pressure liquid chromatography (MPLC)
- Pressure limit 30-5 bar
- 25, 50, 70 and 80 mm ID columns with column stands available
- Compatible with any LC system
- For all types of silica and soft gels
- Aqueous buffers and solvents
- Temperature range 4–40°C
- Easy self-packing

ECO columns are glass columns suitable for all types of soft gel and medium pressure (pressure limit 30–5bar) liquid chromatography applications. With a choice of one or two adjustable length pistons, they are available in two versions: **AB (aqueous buffer)** for use with aqueous buffers and cold room applications and **SR (solvent resistant)** for all forms of normal and reversed phase chromatography.

ECO columns are produced using high-precision CNC manufacturing. They are competitively priced and equipped with a screw-lock system which makes it possible to open and seal the column simply and guickly.

Each column passes a quality control pressure test.

# Drawing of Variable Column End Piece – ECO

# **Specifications**

Parameter	Standard Columns
Inner Diameter [mm]	10, 15, 25, 50, 70, 80
Length Glass Body [mm]	120, 200, 450, 750, 1000
Pressure Range* [bar]	30–5
Temperature Range [°C]	4–40
Versions	AB (Aqueous Buffer)
	SR (Solvent Resistant)
Combinations Of Pistons	Two adjustable pistons: Multivario
Combinations Of Pistons	One adjustable piston: Vario
Wetted Parts	AB: POM pistons, glass or PE frits, FKM or EPDM O-ring, borosilicate glass body
	SR: PVDF pistons, glass or stainless steel frits, FFKM O-ring, borosilicate glass body
Connections	The columns are supplied with different adapters to allow direct connection to any LC-system (e.g. ÄKTA sytem)
Accessories Supplied (columns with ID 10–15mm)	1 x frit removal tool 2 x plugs, PTFE (1/4"-28G) 1 x 2 m FEP tubing (0.8 x 1.6 mm) 4 x ¼"-28G nut and ferrule for 1/16" tubing 2 x M6 nut and ferrule for 1/16" tubing 2 x 10-32 fitting for 1/16" tubing
Accessories Supplied (columns with ID 25–80mm)	1 x frit removal tool 2 x plugs, PTFE (1/4"-28G) 1 x 2 m FEP tubing (1.6 x 3.2 mm) 4 x ¼"-28G nut and ferrule for 1/8" tubing 2 x M6 nut and ferrule for 1/8" tubing

\*Pressure limit depends on inner diameter.

#### YMC Glass Columns

# **Specifications**

Your benefit of Multivario option: Greater flexibility due to expanded bed length and column volume ranges!

#### What is the difference between Vario and Multivario options?

Adjustable and non-adjustable (fixed) pistons are available for the ECO columns. Two different options are available for combining these two pistons:

#### 1. Vario: One adjustable and one fixed piston

#### 2. Multivario: Two adjustable pistons

The selection of the option depends on the required ranges of bed lengths and column volumes.

Inner diameter	Pressure limit (bar)	One adjustable piston (Vario)		<b>Two adjusta</b> (Multi	
<b>column</b> (mm)		Bed length range (mm)	Column volume range (mL)	Bed length range (mm)	Column volume range (mL)

# **Chemical resistance**

On the following two pages, the chemical resistances (standard conditions) for the available standard versions are listed.

#### ECO – AB version

Solvent	Columns with 10–50mm ID POM piston, FKM O-ring and glass frit	Columns with 70–80 mm ID POM piston, EPDM O-ring and PE frit
Acetone		
Acetonitrile		
Ammonium dihydrogen phosphate		
Cyclohexane		
Dichloromethane		
EDTA (3%)		
Acetic acid (6%)		
Ethanol		
Ethyl acetate		
<i>n</i> -hexane		
Isopropanol		
Methanol		
NaOH (2M)		
HCI (1 M)		
Urea (8M)		
NaCI (1 M)		
Na <sub>2</sub> SO <sub>4</sub> (0.5 M)		

Not resistant

Limited resistant

Resistant

## **Chemical resistance**

#### ECO – SR version

Solvent	Columns with 10–50 mm ID PVDF piston, FFKM O-ring and glass frit	Columns with 70–80 mm ID PVDF piston, FFKM O-ring and stainless steel frit
Acetone		
Acetonitrile		
Ammonium dihydrogen phosphate		
Cyclohexane		
Dichloromethane		
EDTA (3%)		
Acetic acid (6%)		
Ethanol		
Ethyl acetate		
<i>n</i> -hexane		
Isopropanol		
Methanol		
NaOH (2M)		
HCI (1 M)		
Urea (8M)		
NaCl (1 M)		
Na₂SO₄ (0.5M)		

If your solvent is not listed, please contact us for chemical resistance check.

**Note:** The resistance of the standard versions is based on the resistance of the each wetted part. If one part is limited or not resistant, the whole column is marked with this characteristic as it is the critical part thereof.

For all columns, where the combination of the wetted parts varies from the above listed ones, the chemical resistance can vary, too. Therefore, please contact us if you need assistance regarding the chemical resistance.

ECO Glass Columns

#### YMC Glass Columns

### **Packing Adapters**

#### Do I need a packing adapter?

Packing adapters are used if the packing method requires additional column volume during the packing process.

More volume than given by the column alone may be required when the column is packed with the slurry method. A suspension of material and packing solFor more information on column packing download the ECO manual or visit one of our seminars!

vent in a concentration of approximately 30–50% is used, depending on the packing material. The additional packing solvent above the finished column bed will be removed later but during the packing process the packing adapter gives the additional volume which is required for this method.

- 1. Coupling unit
- 2. Snap ring
- 3. Spring washer
- 4. Counter screw
- 5. Glass body

#### What are the components of the packing adapter?

The ECO series packing adapters consist of a column coupler and an empty glass body. These must be of the same diameter as the column to be packed and must be used as packing adapters, not for extending the length of a column body during use. The product manual supplied with each column contains detailed examples of dry packing and slurry packing techniques.

#### How to install the packing adapter?

- 1. Remove the upper end piece from the column body.
- 2. Put the counter screw of the coupling unit on the column body. Take care that just the blue column coupler snap ring is included.
- 3. Install the end piece on top of the glass body of the packing adapter.

#### YMC Glass Columns

# **Packing Adapters**

One of our lab services is glass column packing with your choice of material.

#### How to order a packing adapter?

#### 1. Select the correct column coupler

	Inner diameter column	Identification for coupling unit	O-ring
Combinations	ECO10 (10 mm ID) ECO15 (15 mm ID) ECO25 (25 mm ID) ECO50 (50 mm ID) ECO70 (70 mm ID) ECO80 (80 mm ID)	KU/	V-3 FKM (AB, 10–50 mm ID) E EPDM (AB, 70–80 mm ID) K-3 FFKM (SR, 10–50 mm ID)
Example EC010		KU/	V-3
Inner diameter column 10 mm			
O-ring			10 mm ID column, AB version, FKM O-ring

#### 2. Select the correct glass body

Glass bodies with the following dimensions are available:

Inner diameter (mm)	10, 15, 25, 50, 70, 80	
Column length (mm)	120, 200, 450, 750, 1000	

The length of the additional glass body used should be selected to allow:

- Double the volume of slurry compared to the required packed bed volume if packing silica materials
- Triple the volume of slurry for softer packing materials

The part number for the glass body is:

#### ECOID/length e.g. ECO10/120

If you need assistance in choosing the right packing adapter, please contact YMC!

# **Ordering Guide**

The part numbers for the columns contain information on the column type, inner diameter, maximum bed length, piston type, frit porosity and seal (O-ring) material. In brackets, the corresponding ordering code is quoted.

#### 1. Inner diameter of your column:

Inner Diameter [mm]	Pressure Limit [bar]
10 (ECO10)	30
15 (ECO15)	25
25 (ECO25)	15
50 (ECO50)	10
70 (ECO70)	5
80 (ECO80)	5

#### 2. Maximum bed length

Maximum bed length [mm]
120 (120)
200 (200)
450 (450)
750 (750)
1000 (999)

#### 3. Piston Type

I adjustable pistons: Vario (V) II adjustable pistons: Multivario (M)

#### 4. Frits

Porosity	
10–16 µm (0)	
16–40 µm (3)	
40–100 μm (4)	

#### 5. O-rings

Material			
FKM (V):	AB versions, 10–50 mm ID		
EPDM (E):	AB versions, 70–80 mm ID		
FFKM (K):	SR versions, 10–80 mm ID		

# **Ordering Guide**

	Inner diameter column	Maximum bed length	Combination of pistons	Frit Porosity	O-ring material
Combination	ECO10/ (10 mm) ECO15/ (15 mm) ECO25/ (25 mm) ECO50/ (50 mm) ECO70/ (70 mm)	120 (max. 120 mm) 200 (max. 200 mm) 450 (max. 450 mm) 750 (max. 750 mm) 999 (max. 1000 mm)	V (I adjustable piston) M (II adjustable pistons)	<b>0</b> (10–16 μm) <b>3</b> (16–40 μm) <b>4</b> (40–100 μm)	V (FKM, AB) E (EPDM, AB) K (FFKM, SR)

Inner diameter column	10 mm				
Max. bed length		120 mm			
Combination of pistons			2 adjustable pistons (Multivario)		
Frit porosity				10–16 µm	
O-ring material					Solvent resistant version, FFKM

### **Accessories and Spare Parts**

1. Column Stand: A column stand is available for ECO columns with 25, 50, 70 and 80 mm ID.

**2. Packing adapter:** Packing adapters are available for all available inner diameters in different lengths. For more information, see pages 12 and 13.

### **Accessories and Spare Parts**

**End Pieces:** Assembly includes inner/external piston, counter nut and screw, screw nut, snap ring, spring washer, O-ring and frit

- 1. O-rings and frits
- 2. Glass body
- 3. Fittings and tubing/accessory pack

For ordering accessories or spare parts, please contact YMC!

# Easy Connection of YMC Glass Columns to Äkta Systems

YMC have specifically designed an adapter to allow easy connection of YMC glass columns to Äkta systems. This adapter will allow direct connection of the 10-32 fittings of the Äkta systems

to the inlets and outlets of YMC glass columns. This adapter is compatible to all existing YMC glass columns with internal diameters between 10 to 50 mm and can be ordered as a pack of 2 pieces.

#### **YMC** Glass columns

This tool helps you to open and close YMC glass columns.

The Handling-Loop is universally applicable to all available inner diameters of YMC HT, ECO and ECO<sup>PLUS</sup> glass column ranges.

#### **Ordering information**

#### ECO and ECO<sup>PLUS</sup> Glass Columns

YMC Glass Columns

# **ECOPLUS** Glass Columns

### **ECOPLUS Glass Columns**

- First choice for high pressure application (preparative HPLC)
- Pressure limit: 80–15 bar
- Columns with 5 mm ID available
- Compatible with any LC system
- For all types of silica and soft gels
- Aqueous buffers and organic solvents
- Temperature range 4–40 °C (AB) or 16–40 °C (SR)
- Easy self packing

ECO<sup>PLUS</sup> columns are multi-purpose columns for all types of liquid chromatography applications even with high operating pressures. The columns are available in two versions:

- 1. Aqueous buffer version (AB): For applications with aqueous buffers
- 2. Solvent resistant version (SR): For applications with organic solvents

Three different combinations of pistons are available for a wide range of bed lengths and volumes. The solvent resistant pistons are equipped with Teflon chevrons for sealing (except 50 mm ID), the AB versions with O-rings.

ECO<sup>PLUS</sup> columns are suitable for the entire spectrum of normal phase and reversed phase chromatography as well as biochromatography.

All columns are produced in the YMC Europe facilities in Germany. The high pressure resistance is guaranteed by a special construction of the column including the locking system (Quick-Lock).

The high-quality columns are made using high precision CNC machines and undergo several rigorous quality controls before they are delivered.

#### What is the difference between Short, Short/Long and Long?

For the ECOPLUS column short and long pistons are available which can be combined in three different ways:

- 1. Short: Two short pistons
- 2. Short/Long: One short and one long piston
- 3. Long: Two long pistons

The choice of the version depends on the required ranges of bed lengths and column volumes.

	Short Pistons		Short/Long Pistons		Long Pistons	
Inner diameter (mm)	Bed length range (mm)	Volume range (mL)	Bed length range (mm)	Volume range (mL)	Bed length range (mm)	Volume range (mL)

### **Pressure resistance**

In order to guarantee the high pressure stability, special materials and a unique end piece system including the Quick-Lock system are used

for the ECO<sup>PLUS</sup> columns. The pressure resistance depends on the inner diameter and the column version (AB or SR).

Inner Diameter [mm]	Pressure Limit [bar]
5	AB version: 80 bar, SR version: 80 bar
10	AB version: 80 bar, SR version: 50 bar
15	AB version: 70 bar, SR version: 50 bar
25	AB version: 50 bar, SR version: 50 bar
35	AB version: 40 bar, SR version: 40 bar
50	AB version: 30 bar, SR version: 15 bar

### **Chemical resistance**

On the following two pages, the chemical resistances (standard conditions) for the available standard versions are listed.

#### ECOPLUS – AB version

Solvent	Columns with 5–50 mm ID, PE pistons, PE frits, EPDM O-rings
Acetone	
Acetonitrile	
Ammonium dihydrogen phosphate	
Cyclohexane	
Dichloromethane	
EDTA (3%)	
Acetic acid (6%)	
Ethanol	
Ethyl acetate	
<i>n</i> -hexane	
Isopropanol	
Methanol	
NaOH (2M)	
HCI (1 M)	
Urea (8M)	
NaCl (1 M)	
Na₂SO₄ (0.5M)	

Not resistant
Limited resistant
Resistant

## **Chemical resistance**

#### ECOPLUS – SR version

Solvent	Columns with 5 – 35 mm ID, PTFE piston, PTFE triple chevron lamellar seals, glass/stainless steel frits	Columns with 50mm ID, PTFE pistons, FFKM O-rings, stainless steel frits
Acetone		
Acetonitrile		
Ammonium dihydrogen phosphate		
Cyclohexane		
Dichloromethane		
EDTA (3%)		
Acetic acid (6%)		
Ethanol		
Ethyl acetate		
<i>n</i> -hexane		
Isopropanol		
Methanol		
NaOH (2M)		
HCI (1 M)		
Urea (8M)		
NaCl (1 M)		
Na <sub>2</sub> SO <sub>4</sub> (0.5 M)		

Limited resistant Resistant

If your solvent is not listed or you need a resistant column version which is not listed, please contact us for chemical resistance check or a custom made version.

**Note:** The resistance of the standard versions is based on the resistance of the each wetted part. If one part is limited or not resistant, the whole column is marked with this characteristic as it is the critical part thereof.

For all columns, where the combination of the wetted parts varies from the above listed ones, the chemical resistance can vary, too. Therefore, please contact us if you need assistance regarding the chemical resistance.

#### YMC Glass Columns

## **Packing Adapters**

#### Do I need a packing adapter?

Packing adapters are used if the packing methods requires additional column volume during the packing process.

More volume than given by the column is required when the column is packed with the slurry method. A suspension of material and packing solvent in a For more information about glass column packing, download the manual or contact your rep!

concentration of approximately 30–50% is used, depending on the packing material. The additional packing solvent above the finished column bed will be removed later but during the packing process the packing adapter gives the additional volume which is required for this method.

1. Snap ring (column version) 1 2. Counter nut (bayonet) 3. Glass body 2 (not included in column coupler) 4. Column coupler counter nut 5. Column coupler snap ring 3 6. Connection screw (bayonet) 7. O-ring 4 8. Teflon inset 9. O-ring 5 6 7 8 9

#### What are the components of the packing adapter?

The ECO<sup>PLUS</sup> series of packing adapters consist of a column coupler and an empty glass body. These must be of the same diameter as the column to be packed and must be used as packing adapters, not for extending the length of a column body during use. The product manual supplied with each column contains detailed examples of dry packing and slurry packing techniques.

#### How to install the packing adapter?

- 1. Remove the upper end piece from the column.
- 2. Add the column coupler counter nut (bayonet) including the column coupler snap ring to the column body.
- 3. Fix the connection screw and the counter nut first. Fix the column coupler counter nut afterwards.

# **Packing Adapters**

One of our lab services is glass column packing with your material!

#### How to order a packing adapter?

#### 1. Select the right column coupler

	Inner diameter column	Identification for coupling unit	O-ring
Combinations	TAC05 (5 mm ID) TAC10 (10 mm ID) TAC15 (15 mm ID) TAC25 (25 mm ID) TAC35 (35 mm ID) TAC50 (50 mm ID)	KU	-AB FKM O-ring -SR FFKM O-ring
Example	TAC10	KU	-АВ
Inner diameter column	10 mm		
O-ring			FKM for aqueous buffer version

#### 2. Select the right glass body

Glass bodies with the following dimensions are available:

Inner diameter (mm)	5, 10, 15, 25, 35, 50
Column length (mm)	125, 250, 500

The length of the additional glass body used should be selected to allow:

- Double the volume of slurry compared to the required packed bed volume if packing silica materials
- Triple the volume of slurry for softer packing materials

The part number for the glass body is:

TACID/length-2 e.g. TAC10/125-2

If you need assistance in choosing the right packing adapter, please contact YMC!

## **Accessories and Spare Parts**

### **Accessories and Spare Parts**

Spare parts available for ECOPLUS glass columns:

- Glass bodies
- Pistons
- O-rings
- Frits

Accessories available for ECOPLUS glass columns:

- Coupling units
- Tubing
- Fittings (nuts and ferrules) and adapters

For the complete listing of all available accessories and spare parts and their related ordering codes, please request our pricelists as PDF files.

	Inner diameter column	Maximum bed length	Combination of pistons	Frit material	Frit porosity	Version
Combinations	TAC05/ (5 mm ID) TAC10/ (10 mm ID) TAC15/ (15 mm ID) TAC25/ (25 mm ID) TAC35/ (35 mm ID) TAC50/ (50 mm ID)	<b>125</b> (max. 125 mm) <b>250</b> (max. 250 mm) <b>500</b> (max. 500 mm)	– (2 short pistons) SL (1 short + 1 long piston) L (2 long pistons)	PE (polyethylene, AB version) G (sintered glass, SR version ≤ 15 mm ID) S (stainless steel, SR version ≥ 25 mm ID)	2 (2 μm) 5 (5 μm, only for PE) 0 (10 μm)	-AB-2 (aqueous buffer) -SR-2 (solvent resistant) -SR-NK (solvent resistant, 50 mm ID)
Example	TAC25/	500		S	2	-SR-2
Inner diameter column	25 mm					
Max. bed length		500 mm				
Combination of pistons			2 short pistons			
Frit material				stainless steel		
Frit porosity					2 µm	
Version						Solvent resistant

### **Laboratory Services**

#### Save time and choose a packed column

If you are working on a tight schedule or you do not have sufficient experience in column packing here is a solution!

Rely on the experience of YMC and ask for a packed YMC HT, ECO or ECO<sup>PLUS</sup> column. Our knowledge of packing is your benefit!

#### Our services include packing of

- YMC HT, ECO and ECO<sup>PLUS</sup> columns Depending on your required bed length, you can choose a column from our portfolio. If you can't find a suitable standard product, we will gladly discuss the options of a customised column with you.
- Stationary phases from YMC as well as from other suppliers If your method is restricted to a certain stationary phase, we pack your column according to your needs, using stationary phases made by YMC or any other supplier.

# Ask your rep for more information!

# Also of interest

YMC HT is the new standard for temperature sensitive applications. The innovative design allows an operation under high temperatures up to 70°C with reliable results.

YMC's BioPro IEX are polymeric ion exchange resins for the purification of biologicals. They represent one part of the three part YMC-Prep portfolio: silica, hybrid silica and polymer media.

YMC-Triart Prep is a hybrid silica phase, stable between pH 2.0–10.0. It is available with various modifications for RP purifications. Г

For help in selecting your laboratory or pilot scale glass column, please complete this questionnaire and return it to your rep or to **info@ymcamerica.com**.

Questionnaire for YI	MC Glass Columns	
1. Inner diameter (mm):		
2. Minimum bed length (mm):		
3. Maximum bed length (mm):		
4. Bed volume (mL):		
5. Maximum pressure (bar):		
6. Temperature range:		
7. Biocompatibility:	Yes No	
8. Packing material:		
9. Particle size of packing material:		
10. Solvents:		
11. Are you interested in column packing services?	Yes No	
12. Quotation for packing adapter required:	Yes No	
13. Regulatory requirements:		
13. Additional notes:
